## FAQ

What is the difference between full container load and less than container load?

Full container load means that the entire container is filled with goods. Less than container load means that only a portion of the container is filled with goods.

What are the advantages of full container load?

Full container load offers several advantages, including faster transit times, reduced risk of damage, and lower costs.

What are the disadvantages of full container load?

Full container load may require more space and may be more expensive than less than container load.

What is the difference between full container load and less than container load?

Full container load means that the entire container is filled with goods. Less than container load means that only a portion of the container is filled with goods.
